

Bibliography

Dr. Ballester is a Royal Society Wolfson Fellow & Associate Professor at Imperial College London, where he heads a group in Artificial Intelligence for Healthcare. Before this, he was Assistant Professor at INSERM in France after several postdoctoral fellowships at the University of Oxford, the University of Cambridge and the European Bioinformatics Institute in the UK. His research interests include the development and application of computational approaches for early drug discovery (e.g. virtual screening, target prediction) and precision oncology (e.g. multi-omics prediction of patient response to drug treatments). <https://ballestergroup.github.io/>
