

Mikel Ganuza was awarded his Ph.D. from the *Universidad Autónoma de Madrid* in 2009. His dissertation focused on understanding the roles of Cdk7 in cell cycle and transcriptional regulation. He worked as a Ph.D. student in the laboratory of Mariano Barbacid at the Spanish National Cancer Center (C.N.I.O.), Madrid. From 2012 he has trained as a postdoctoral fellow at St. Jude Children's Research Hospital, Memphis, TN, USA. in S. McKinney-Freeman's laboratory focusing on mechanisms implicated in hematopoietic stem cell specification during embryogenesis.
