

Miguel Vicente Manzanares (Salamanca, 1973) is a Tenured Scientist from CSIC, and has been a principal investigator at the CIC since late 2017. His research focuses on the role of mechanical force generation in cancer dissemination, immune responses, and more recently infectious disease. In addition to his research, he is the Coordinator of the Spanish Excellence Network in Mechanobiology and Editor-in-Chief of European Journal of Cell Biology (Elsevier).
