

Cristina Viéitez started her own group in April 2023 at the Functional Biology and Genomics Institute (IBFG), Salamanca.

She studied Biology at the University of León, did a PhD in Chromatin Biology at the Pompeu Fabra University in Barcelona (Posas & de Nadal groups) and then moved to Germany for a postdoc in Systems Biology, where she had a double affiliation between EMBL Heidelberg (Typas group) and EMBL-EBI (Beltrao group). After one year as a senior scientist at ETH Zurich in Switzerland, she came back to Spain with the Ramón y Cajal talent attraction programme to start her group at IBFG (CSIC).
